6 Experts Available For Analysis On Supreme Court Social Media Cases

FEBRUARY 21, 2023

Dominik Doemer

On February 21st and 22nd, the Supreme Court is hearing two cases with important implications for social media, digital speech, and Section 230 - Gonzalez v. Google and Twitter v. Taamneh. For reporters seeking expert sources for their coverage of the cases, the following researchers are available to provide comments.

WAYNE BUENTE
University of Hawaii at Manoa

Buente's research focuses on the interplay between society and information and communication technologies (ICTs), including issues relating to information systems, digital inequality, social media and health disparities.

KAIPING CHEN
University of Wisconsin-Madison

Chen's research employs data science and machine learning methods as well as interviews to examine how digital media and technologies affect politicians' accountability to public well-being and how deliberative designs can improve the quality of public discourse on controversial & emerging technologies and mitigate the spread of misinformation.

KEVIN T. LEICHT
University of Illinois at Urbana-Champaign
Leicht's research focuses on the consequences of social inequality, social media misinformation, economic development, and political sociology. Leicht has testified before Congress on issues of social media misinformation and is the PI on a research and development project developing AI tools to fight social media misinformation.

BEN MILLER
Emory University

Miller researches computational approaches to understanding hate speech, radicalization, and witness testimony. His work has been supported by the Department of Defense, National Science Foundations, the Royal Netherlands Academy of Arts and Sciences, the Mellon Foundation, and the Knight Foundation, and has appeared in venues in computer science, political science, the humanities, and urban studies.

DEANA A. ROHLINGER
Florida State University

Rohlinger's research focuses on communications, conservative movements, and civic engagement. Overarching themes in Rohlinger's writing include the effects of digital media on political participation and activism as well as the role of virtual communities in political polarization.

SARAH SOBIERAJ
Tufts University
