

2 Experts Available for Timely Analysis on TikTok Court Case

JANUARY 10, 2025

Dominik Doemer

With the Supreme Court hearing arguments in *TikTok, Inc. v Garland*, the future of this social media app hangs in the balance. For reporters covering the hearing and its implications, the following university professors are available to provide commentary and analysis:

ALAN ZACHARY ROZENSHTein

University of Minnesota-Twin Cities

Rozenshtein explores how digital technology shapes law and legal institutions, and vice versa, with a focus on constitutional law, administrative law, and criminal procedure. Overarching themes in Rozenshtein's writing include the effect of new technology on law-enforcement, foreign intelligence and national security agencies, and the relationship between the government and the technology sector.

JEREMY STRAUB

North Dakota State University

Straub's research focuses on technology development and technology policy. Overarching themes in his writings include artificial intelligence, cybersecurity, 3D printing and aerospace.
